

Every Home Is A Target

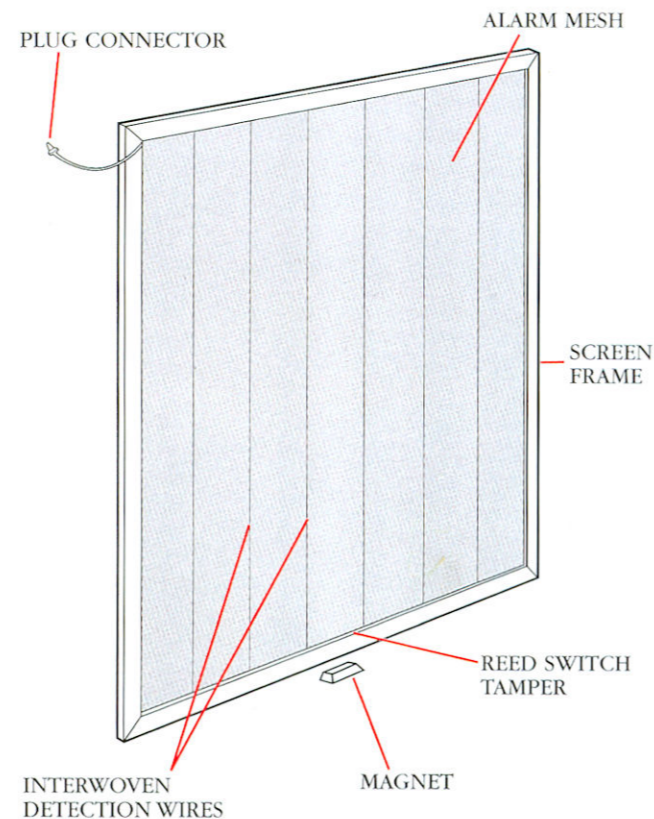

It is a startling fact that at least one residential break-in occurs in the United States every 14 seconds. The majority of these intruders enter through open and unprotected windows. However, there is a proven, dependable security device which has been used in millions of windows to deter and detect these break-ins, even if the window is open. It's called a **SECURITY SCREEN**.

Enjoy Fresh-air Without Sacrificing Security

Look closely at the open window pictured above and you will see this almost undetectable veil of protection. While providing an effective barrier over the window opening, it still allows a free flow of light and air into your home and leaves your view virtually unobstructed. However, any attempt to tamper with the **SECURITY SCREEN** will immediately sound your alarm to scare off an intruder *before* he can enter your home.

Looks Like A Screen, Works Like An Alarm

The concept of the **SECURITY SCREEN** is really quite simple. Your existing frame, or new custom made frame, is screened with special alarm mesh which has interwoven detection wires every four inches.

In addition, a magnetic reed switch tamper and plug connector are added to the screen frame. These components are internally wired together within the screen frame to form a protective grid which is plugged into your alarm system.

SECURITY SCREENS

A "Breeze" To Live With

When your alarm system is turned "off" the **SECURITY SCREEN** can be easily removed to allow normal window and screen cleaning. When the system is "on", if any detection wire is cut, or any attempt is made to unplug, or remove the **SECURITY SCREEN**, it will immediately activate your alarm.

SECURITY SCREENS offer burglar protection with the windows open or closed and do not interfere with popular window treatments. Windows can be opened or closed even while the alarm system is armed. Unlike motion detectors, **SECURITY SCREENS** allow unrestricted movement by you and your pets throughout your entire home.

SECURITY SCREENS

Attractive Design

To complement any home, **SECURITY SCREENS** are available in several attractive color combinations:

Color Combinations

Frames - Brown, White or Gray
Alarm Mesh - Charcoal or Silver Gray

Highest Quality

Our **SECURITY SCREENS** are manufactured to the highest quality possible by using only the most reliable components available. In addition, each **SECURITY SCREEN** comes with our manufacturer's warranty.

Special Features

- Fits any style window
- Allows free movement throughout the home without activating the alarm
- Existing frames can usually be used
- Compatible with all closed circuit alarm systems
- Allows unrestricted emergency exit
- Made of durable, long lasting materials
- Detects intruders *before* they enter your home
